Trion® FPGA Selector Guide

Trion® FPGAs are simple, easy to use, low power, and designed to get the job done quickly. They have what you need, compared to the kitchen sink approach of a “full-featured” FPGA. So you can spend your time innovating your product, instead of figuring out how to use features you didn’t really want in the first place.

This selector guide summarizes Trion FPGAs by ordering code and resources to help you choose the right product for your application.

Trion Family Features

4K to 120K Logic Elements	5 Kb Embedded RAM Blocks	18 x 18 Multipliers	PLLs	GPIO	LVDS	MIPI CSI-2 & D-PHY	DDR DRAM Controller & PHY	SPI & JTAG Configuration

Product Longevity

At Elitestek we are committed to supplying our customers with a stable supply of supported products throughout their product life cycle. We are committed to supporting our Trion family of FPGAs in customer designs until at least 2045. Contact your local sales representative for more information on product life cycles.
